

# **ELECTRA 251**

**August - août 2010**

## **TABLE DES MATIERES –TABLE OF CONTENTS**

### **Reports**

- WG A1.08 Power Station Large Motors Requirements in the Field of Standards
- WG B2.21 Investigation of Different Liquid Solutions for Dye Penetration Tests used in Standard IEC 62217 for Design and Routine Testing

### **Annual Activity Report**

**SC D1 – Materials and Emerging Test Techniques**

### **Life of the Association**

SC D2 Colloquium Japan, October 2009, Fukuoka, Japan

### **Technical Brochures**

- 421** -WG B5.34 The Impact of Renewable Energy Sources and Distributed Generation on Substation Protection and Automation
- 422**– WG C1.16 Transmission Asset Risk Management  
Gestion des Risques dans le Transport
- 423** – WG C6.10 Technical and Commercial Standardization of DER / microGrid Components
- 424** – WG B5.20 New Trends for Automated Fault and Disturbance Analysis
- 425** – JWG B2/C1.9 Increasing Capacity of Overhead Transmission Lines; Needs and Solutions
- 426**-WG B2.26 Guide for Qualifying High Temperature Conductors for Use on Overhead Transmission Lines
- 427**- WG B5.38 The Impact of Implementing Cyber Security Requirements using IEC 61850
