

Technical Brochures

Technical Brochures: an output of CIGRE's 16 Study Committees and their 250+ Working Groups

Technical Brochures are globally diverse, comprehensive publications. Over 700 have been published to date, with around 40 new ones added each year.

Download all CIGRE publications here [e-cigre.org](https://www.e-cigre.org)

Technical Brochures cover the full spectrum of the power system and are factually robust, with each undergoing a rigorous peer review process.

Technical Brochures are the output of CIGRE's 16 Study Committees and their 250 Working Groups. Over 700 have been published, with the addition of about 40 new ones each year.

The Working Groups that produce Technical Brochures are made up from a diverse collection of technical experts spanning the entire power system industry. This ensures that Technical Brochures are unbiased, factually robust and reliable. Technical Brochures undergo a rigorous peer review process to ensure their accuracy and integrity.
