

# Introducing CIGRE

## Standing for power system expertise since 1921

Established in 1921 in Paris, France, CIGRE is a global community committed to the collaborative development and sharing of end to end power system expertise. The community features thousands of professionals from over 90 countries and 1250 member organisations, including some of the world's leading experts. At its heart are CIGRE's 61 in country National Committees offering diverse technical perspectives and expertise from every corner of the globe.

CIGRE operates the world's foremost knowledge programme, spanning 16 domains of work encompassing all the core areas of the power system. Across these domains 250+ Working Groups draw and build on practical expertise to solve existing and future challenges facing the power system.

CIGRE's knowledge programme includes an extensive range of local and international events, culminating every two years at the Paris Session in France – a unique thought leadership congress and the number one global power system event.

Over the last 100 years the work of CIGRE has contributed to many of the key technical cornerstones of the modern power system. CIGRE's renowned publications, developed through the collaborative sharing of 'real world experiences', are in many cases the authoritative source of reference information.

All this means that when electricity industry professionals look for the unbiased, fact-based answers they need, they turn to CIGRE, the world's preeminent source for power system expertise.

## Purpose

To foster engagement and knowledge sharing among power system professionals globally to enable the sustainable provision of electricity for all.

## Mission

To contribute to the betterment of the power system by enhancing the expertise of the people within it.

## Vision

To be universally recognised as the leading global community for expertise in all aspects of electric power systems.
