The value we deliver

Connecting power system people with the knowledge and solutions they need

There are many benefits in belonging to and participating within the world of CIGRE. Our members tell us that there are nine major benefits that stand out. For individual professionals, collective members and their wider organisations each benefit is enabled and substantiated by the CIGRE organisation, programme and outcomes it delivers. Watch the video for a summary of the nine or read on.

1. Be prepared for the future

CIGRE's unique structure and approach plugs members in to a future focused industry perspective simply not accessible from within a single organisation.

2. Learn from real world experiences, lessons and successes

As a collaborative, global community of pragmatic professionals, CIGRE members share best practice, technical expertise and solutions openly and inclusively discussing and debating their real world experiences, lessons and successes.

3. Inform your decisions with diverse perspectives from every corner of the globe

To make optimal power system decisions at home it is essential to take a world view about approaches to the environment, legislation, regulation, technologies and markets. CIGRE's unique global network of practitioners provides diverse perspectives.

4. Solve local challenges

At the heart of CIGRE are its 61 National Committees (NCs) spanning over 90 countries. NCs are on the ground, local volunteer driven organisations. They implement CIGRE's global strategic and technical plans to develop solutions to power system challenges. The solutions are shared across CIGRE's global network, but ultimately applied locally.

5. Source the most authoritative reference information

Like the organisation itself, CIGRE publications stand alone as an authoritative technical source of power system knowledge and real world solutions.

6. Get unbiased facts

CIGRE's fact-based approach is completely unbiased, vendor neutral and open to inclusive, frank discussion and debate about any issues trends and challenges facing the power industry.

7. Gain access to world leading experts

The calibre of CIGRE members is very high. Key CIGRE positions are filled by top technical people who have built their expertise over many years of power system experience, often internationally recognised by senior peers as world leaders.

8. Grow your skills

Grow your individual and organisational skills through CIGRE's unique peer to peer environment and broad training and educationa

opportunities.

9. Connect with your industry in a technical setting

Grow your individual and organisational network, profile and influence by participating at CIGRE events, on Working Groups and by writing and revising of reports and brochures.

For power system expertise

Creating benefits in local communities and organisations the world over

Nine major CIGRE member benefits

There are many benefits in belonging to and participating within the world of CIGRE. Our members tell us that there are nine major benefits that stand out. For individual professionals, collective members and their wider organisations each benefit is enabled and substantiated by the CIGRE organisation, programme and outcomes it delivers.

01 Be prepared for the future

CIGRE's unique structure and approach plugs members in to a future focused industry perspective simply not accessible from within a single organisation.

- CIGRE's knowledge programme is derived from the latest collaborative expertise of thousands of industry professionals.
- CIGRE draws all this together into a strategy firmly focused on addressing the key issues, challenges and trends of the power system of today and tomorrow.
- CIGRE's Technical Council channels the strategy into a comprehensive, pragmatic, constantly evolving technical programme of work.
- Using state of the art technology and techniques, CIGRE Working Groups systematically develop the workable, on the ground solutions the industry needs to succeed.

02 Learn from real world experiences, lessons and successes

As a collaborative, global community of pragmatic professionals, CIGRE members share best practice, technical expertise and solutions, openly and inclusively discussing and debating their real world experiences, lessons and successes. By connecting and learning in this way they save time and money and reduce risk.

03 Inform your decisions with diverse perspectives from every corner of the globe

To make optimal power system decisions at home it is essential to take a world view about approaches to the environment, legislation, regulation, technologies and markets. CIGRE's unique global network of practitioners allows experts to be deliberately selected to ensure a wide geographical representation. Each Working Group usually has experts from each continent, not just Europe or USA.

04 Solve local challenges

At the heart of CIGRE are its 59 National Committees (NCs) spanning over 90 countries. NCs are on the ground, local volunteer driven organisations. They implement CIGRE's global strategic and technical plans to develop solutions to power system challenges. The solutions are shared across CIGRE's global network, but ultimately applied locally.

NCs are where you'll find the most motivated, knowledgeable power system professionals in your local industry. CIGRE gives you access to them and therefore the greatest opportunity to solve your local challenges, whether they be known or emerging.
